Allowable Subject Matter

Claims 1-3 and 6-37 are allowed.

The following is an examiner's statement of reasons for allowance: The following is an examiner's statement of reasons for allowance: The independent claims distinguish themselves from the prior art by translating, using metadata, the client data access transaction into a server data access transaction for access to the data maintained within at least one of the plurality of server computer systems according to the data access operation specified by the client data access transaction. This process is done by obtaining a virtual data identifier specified in the client data access transaction; matching the virtual data identifier specified in the client data access transaction to a matching forwarding table entry in a forwarding table to identify a corresponding physical data identifier from the matching forwarding table entry; creating the server data access transaction by replacing the virtual data identifier specified in the client data access transaction with the corresponding physical data identifier in the matching forwarding table entry, assigning a server transaction identity to the created server data access transaction, determining if an active transaction table includes an active transaction table entry that corresponds to the client transaction identity, and if not, creating an active transaction table entry including the assigned client transaction identity and an identity of the client computer system from which the client data access transaction was received and storing the server transaction identity in an active transaction table entry that includes the client transaction identity of the received client data access transaction in combination with all the elements in the independent claims.

Art Unit: 2444

Although prior art system exist that allow the multiple adaptive load balancing of multiple servers, these prior art do not support the translation system using metadata that includes translation data described in the present invention.

The dependents claims are allowed due to their dependence on the independent claims.
